Jiv Tuban

AI Engineer · Technical Lead · Full-Stack Software Developer

jivtuban14@gmail.com · github.com/JivSTuban · farfolio.vercel.app · linkedin.com/in/jiv-tuban

SUMMARY

AI engineer who automates manual operations and makes the data trustworthy: 98% lower automation spend at Traciety, and a speed-to-lead agent at Crowdsnare behind 11 vehicle sales and 90% booking conversion.

EXPERIENCE

AI Engineer (Full-Time)
Apr 2026 to present

Traciety · New York NY, remote

One of three engineers on the production dashboard and automations behind 40+ medspa clients.

- Cut automation spend 98%, about $7,000 a year ($600 to $12 a month), by moving workflows from Make.com to n8n self-hosted on DigitalOcean.
- Replaced the stat sheets executives built by hand (about 1 hour per client per week) for all 45 live clinics, and built the client portal now live for about 20 clients.
- Raised booking attribution from 54% to 97% and corrected ad reporting that showed $14,360 against a true $30,100 of spend.

Technical Lead (Full-Time Contract)
Apr 2025 to Oct 2025

Crowdsnare AI · Houston TX, remote

- Managed end-to-end development of 6 AI agent products as the technical contact for clients, leadership and junior teammates.
- Built production lead automation on n8n and GoHighLevel that cut lead processing from manual hours to seconds, including a speed-to-lead agent behind 11 vehicle sales and 90% booking conversion.
- Restored critical production workflows by fixing routing logic, standardizing payloads and adding retries.

Full-Stack Developer (Full-Time)
Jul 2024 to Mar 2025

Freckles Graphics, Inc. · Lafayette IN, remote

- Automated Polaris DTG print production for 500+ daily orders, cutting manual processing time 85%.
- Built a Next.js and TypeScript AI image studio that generates 1K to 4K artwork in under 30 seconds with 95%+ success.
- Built Python/Flask and Supabase order tooling for 5 print locations and a RAG-powered CRM assistant.

AI Automation Developer (Part-Time)
Jul 2025 to Jan 2026

Cinematography for Actors Institute · Los Angeles, remote

- Built AI email automation on Google Cloud Run that answers 70% faster using 50+ SOPs and FAQs.
- Managed the Google Cloud infrastructure and lifted Ghost CMS mobile Lighthouse from 45 to 85+.

Software Engineer Intern
Nov 2025 to Mar 2026

Ayahay · Cebu, hybrid

- Built and deployed a multi-tenant RAG chatbot (knowledge-base SDK plus React chat UI) and moved it to NestJS microservices for about 40% lower latency and 57% better retrieval recall.
- Optimized PostgreSQL route and schedule lookups to sub-second in the Next.js and NestJS maritime booking system.

EDUCATION

BS Information Technology
May 2026

Cebu Institute of Technology University

CERTIFICATIONS

AWS Academy: Cloud Architecting; Cloud Foundations

Udemy: Python & Django Full Stack Bootcamp; Web API in .NET 8; PHP Full Stack Bootcamp; Angular The Complete Guide

Other: Accenture Digital Skills UX; Foundational C# (freeCodeCamp); Java OOP (Codechum)

PROJECTS

- **RAG Knowledge Base Packages** (TypeScript, React, OpenAI, pgvector): reusable SDK and whitelabel React chat widget that give any tenant a RAG chatbot with document ingestion, vector search and streaming answers.
- **OJTech OJT Platform** (React, Vite, Spring Boot): multi-role training platform for students, employers, liaison officers and admins, with AI-generated CVs and cover letters.
- **LinkedIn Growth Automation** (Claude Code, Playwright MCP, pm2): self-driving agent that sends targeted connection requests, follows relevant accounts and comments on fresh AI posts every morning, reaching 400+ connections and followers.
- **InvestaBot Trading Signals** (Python, Discord.py, Polygon.io, Perplexity AI): Discord bot that scores stock, crypto and options signals from technical indicators and news sentiment, and logs outcomes to track its hit rate.
- **GAssure, GCash ImaGnation 2025 Hackathon winner** (Solana, React, Supabase): blockchain escrow that stops middle-man scams in P2P and B2B payments, winning the top prize among 196 teams and 980 students.

SKILLS

Backend: Node.js, NestJS, Spring Boot, Django, FastAPI, Flask, ASP.NET Core, Laravel, REST, microservices.

Frontend: JavaScript, TypeScript, React, Next.js, Vue, Angular, Svelte, Tailwind, Bootstrap, Blazor.

Data/platforms: Supabase, PostgreSQL, MySQL, Airtable, GoHighLevel, Google Sheets, Notion, Slack.

AI/automation: OpenAI API, RAG, MCP, prompt engineering, Playwright, n8n, Zapier, Make, Vapi, ElevenLabs, AI agents.

Cloud/DevOps: AWS, Google Cloud Run, Pub/Sub, Secret Manager, Cloud Storage, Docker, PM2, GitHub, CI/CD, DigitalOcean, Apache Kafka.
